SOUTH CAROLINA COMMISSIONER'S SCHOOL FOR AGRICULTURE NOW **ACCEPTING APPLICATIONS FOR 2023**

Est.

PROGRAM SET FOR JULY 22-28

The South Carolina Commissioner's School for Agriculture summer program is now seeking students for 2023.

A partnership between Clemson University and the South Carolina Department of Agriculture, this summer program strives to provide challenging and enriching collegebased experiences for a limited number of rising 11th and 12th grade students interested in agriculture and natural resources.

Since 2004, the South Carolina Commissioner's School for Agriculture has served more than 600 students representing nearly every South Carolina county and 15 states.

With a focus on hands-on experiences

and activities, the week's agenda demonstrates the vast opportunities that exist within these fields. The program provides an academically focused curriculum that integrates subject matter from a variety of related disciplines, and includes farm visits, leadership activities, and more.

Participants are able to experience firsthand

college student residential life while living in the dorms during the 7-day camp. Throughout the week participants also explore the classrooms, laboratories, field, and forest facilities utilized by Clemson's academic programs. Connections are made with future faculty, advisors, and a variety of state-wide industry leaders including the leadership of the South Carolina Department of Agriculture.

The South Carolina Commissioner's School for

Students at the 2022 Commissioner's School for Agriculture learned about forestry, animal agriculture, and much more.

Agriculture application is live now. Applications are due by April 12, 2023.

Students will be able to choose among several emphasis areas: Livestock Production, Forestry and Natural Resources, and Plant Science.

South Carolina resident tuition is \$500, while non-resident tuition is \$800.

To find out more about the program and to apply, visit clemson.edu/cafls/sccsa.

February 16, 2023 ————

INITIAL THOUGHTS ON **THE 2023 FARM BILL**

or those of us engaged in the legislative process, it's that time again: Every five years, Congress gets to work on a bundle of subjectspecific "titles" related to agriculture spending, programs, and priorities, and related areas like nutrition assistance and conservation policy, otherwise known as the Farm Bill. The fact that they don't do it every year should tell you just how involved and sometimes contentious the Farm Bill can be. This year will be no exception.

If there's one thing I know about farmers, it's that they don't like dramatic change for change's sake. In general, I urge Congress to take a measured approach in 2023.

Maintaining and improving crop insurance programs is a priority. The Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs have allowed many South Carolina farmers to keep farming despite some rocky times in recent history. From the Great Recession to trade wars to the pandemic, there have been a lot of other pressures on bottom lines, but crop insurance helps farmers ride out some market uncertainty and, for the consumer, reduce the volatility in the food supply chain. Whether Congress slightly modifies these programs or alters them significantly, we do need these protections.

I also support the continued efforts to help specialty crop producers navigate risk in the same way we do commodity producers. That may also include more funding for specialty crop research and promotion through the Specialty Crop Block Grant program, as well as simplifying and broadening the definition of what is a specialty crop. **Growing specialty crops** helps farmers diversify their farming income and navigate changes in markets and consumer interest, and it also helps our country strengthen our food security. I hope our federal leaders will keep these considerations in mind as they write the Farm Bill. It can be a balancing act between the "commodity title" support and specialty crop development incentives.

I'll have more to say about the 2023 Farm Bill as the legislative version of making sausage unfolds. Rest assured that we'll be in frequent contact with Senators Graham and Scott, as well as our representatives in Washington, through the development process. I thank them for looking out for the interests of South Carolinians.

Before I close, here's a reminder. Please think of any high schoolaged students in your life who are interested in agriculture, and suggest they take a look at the South Carolina Commissioner's School for Agriculture.

UPCOMING EVENTS

SC Beekeepers Association Spring Conference

February 24 - 25 • 10 am - 5 pm

Join us for "Show Me the HONEY!" — a 2-day opportunity to learn anything and everything about that sticky stuff! Come hear industry experts share how they manage and grow their honey operations and market their honey. Conference will include a variety of presentations and discussions, workshops, a Honey Show, and Vendor Fair. Keynote Speakers include: Bob Binney, Stephen Coy, and Marina Marchese. Registration is now OPEN online.

SIMT Florence-Darlington Technical College 1951 Pisgah Road, Florence

Contact: SC Beekeepers Association president@scstatebeekeepers.com • 864-430-3393 scstatebeekeepers.com

Introduction to Beekeeping Workshop

February 25 • 8:30 – 11 am

This workshop will introduce attendees to beekeeping. It is recommended for those thinking of starting beekeeping, beginning beekeepers, and those who are just fascinated by bees! We will explore the workings of the hive, seasonal tasks, biology, honey harvesting, diseases and pests, as well as what equipment is needed to start. This workshop is included in our 2-day spring conference registration OR may be purchased separately as a stand-alone workshop. See website for more details.

SIMT Florence-Darlington Technical College 1951 Pisgah Road, Florence

Contact: SC Beekeepers Association president@scstatebeekeepers.com • 864-430-3393 scstatebeekeepers.com

Cork Shuckin' Festival

February 25 • 10 am – 6 pm

Paying homage to the Lowcountry, we feature an oyster roast with local craft brews and oysterswith a portion of the proceeds going to the Leukemia & Lymphoma Society. Oysters will be provided by Old Man Oyster Company; other food trucks include A Boy and His Dogs, Lib's Diner, Fed Up Truck LLC, Callie's Hot Little Biscuit and Miss Katie's Sweets LLC!

Deep Water Vineyard

6775 Bears Bluff Road, Charleston 843-559-6867 deepwatervineyard.com

South Carolina Christmas Tree Association 2023 Winter Meeting

February 25 • 1:30 - 5 pm

The meeting will be very informal with a Grower Tree Talk led by Tom Sawyer and ample opportunity for members to interact with fellow members about their operations and experiences. An update on the Historical Project will be presented along with a short business meeting. After adjournment, members will travel to the Oceanview Seafood Restaurant for dinner. There will be no charge for registration for members or attendees from affiliate state associations. Non-member farms are required to pay a \$50 registration fee. This fee will be credited toward 2023 membership dues if the attendee farm chooses to join the association in the first month of attendance.

FLEXCOLD ESTABLISHING COLD STORAGE OPERATIONS IN DORCHESTER COUNTY

\$49.9 MILLION INVESTMENT WILL CREATE 59 NEW JOBS

BY SC DEPARTMENT OF COMMERCE

FlexCold, a leading cold storage warehousing and logistics company, announced plans to establish operations in Dorchester County. The company's \$49.9 million investment will create 59 new jobs.

Headquartered in Charleston, FlexCold specializes in cold storage warehousing and logistics by providing customers with personalized cold storage expertise and targeting strategic locations that are advantageous to today's evolving food supply chain. The company focuses on storing, handling, and distributing poultry, seafood, meat, packaged goods and frozen produce.

Located on Patriot Boulevard in North Charleston, the Dorchester County facility marks FlexCold's first cold storage location in South Carolina and second facility in the United States. The new operations will include a highly modern, cold food storage facility to accommodate a diverse customer base with a focus on receiving a substantial amount of imported goods. Operationally, FlexCold will provide import and export services, U.S. Department of Agriculture and Food and Drug Administration inspections, labeling and repacking, and cross-docking services.

Operations are expected to be online by late summer 2024. Individuals interested in joining the FlexCold team should visit the company's careers page, flexcold.com/work-with-us/.

QUOTES

"We are thrilled to be expanding our footprint by establishing operations within a modern cold storage facility strategically located close to the Port of Charleston. We're proud to further add to the economic development of the area in a meaningful and tangible way by helping meet the need to accommodate critical import and export business, specifically seafood."

—FlexCold Co-Founder Jeff Manno

"We are proud to announce another innovative cold storage chain locating in South Carolina. It's companies such as FlexCold that will continue to enhance our supply chain by providing profound ideas and cutting-edge talent. We welcome FlexCold and look forward to the positive impact that they will make in the state and the Dorchester County community."

-Gov. Henry McMaster

"We welcome FlexCold to Dorchester County and celebrate the new opportunities that the company will create. South Carolina's business-friendly climate, talented workforce and efficient infrastructure network make it the perfect location for FlexCold to establish new operations."

—Secretary of Commerce Harry M. Lightsey III

"SC Ports has significantly upgraded its refrigerated capabilities to efficiently handle more frozen and fresh products for the growing Southeast consumer base. FlexCold's investment will complement these efforts and further enhance the cold chain in South Carolina. This innovative facility will expand the ability to move more frozen products, such as seafood, through the Port of Charleston."

—SC Ports President and Chief Executive Officer Barbara Melvin

"We are excited to welcome FlexCold as the newest company in North Charleston and Dorchester County, as we know the large capital investment and new job opportunities will certainly have a positive and lasting effect on our community. The city of North Charleston proudly commits to remain business-friendly and attentive to the needs of FlexCold and all our local industries."

—City of North Charleston Mayor R. Keith Summey

"Cold storage is a fast-growing segment of the logistics and distribution business at the Port of Charleston, and Dorchester County is excited to welcome FlexCold. It's encouraging to see such a dynamic company establish operations in our community. We thank FlexCold for their investment and look forward to their success."

—Dorchester County Council Chairman Stuart T. Friddle

USDA ANNOUNCES ADDITIONAL ASSISTANCE FOR DAIRY FARMERS

BY USDA

On Jan. 23, the U.S. Department of Agriculture (USDA) announced the details of additional assistance for dairy producers, including a second round of payments through the Pandemic Market Volatility Assistance Program (PMVAP) and a new Organic Dairy Marketing Assistance Program (ODMAP). The update to PMVAP and the new ODMAP will enable USDA to better support small-and medium-sized dairy operations who weathered the pandemic and now face other challenges.

"The Biden-Harris administration continues to fulfill its commitments to fill gaps in pandemic assistance for producers. USDA is announcing a second set of payments of nearly \$100 million to close-out the \$350 million commitment under PMVAP through partnerships with dairy handlers and cooperatives to deliver the payments," said USDA Under Secretary for Marketing and Regulatory Programs Jenny Lester Moffitt. "USDA is also announcing new assistance targeted to small to medium size organic dairy farmers to help with anticipated marketing costs as they face a variety of challenges from weather to supply-chain challenges."

PANDEMIC MARKET VOLATILITY ASSISTANCE PROGRAM

PMVAP assists producers who received a lower value due to market abnormalities caused by the pandemic and ensuing Federal policies. As a result of the production cap increase, USDA's Agricultural Marketing Service (AMS) will make PMVAP payments to eligible dairy farmers for fluid milk sales between 5 million and 9 million pounds from July through December 2020. This level of production was not eligible for payment

under the first round of the PMVAP. Payment rates will be identical to the first round of payments, 80 percent of the revenue difference per month, on fluid milk sales from 5 million to 9 million pounds from July through December 2020. USDA will again distribute monies through agreements with independent handlers and cooperatives, with reimbursement to handlers for allowed administrative costs. USDA will contact handlers with eligible producers to notify them of the opportunity to participate.

As part of the first round, PMVAP paid eligible dairy farmers on up to 5 million pounds of fluid milk sales from July through December 2020. The first round of payments distributed over \$250 million in payments to over 25,000 eligible dairy farmers. These dairy farmers received the full allowable reimbursement on fluid milk sales up to 5 million pounds.

More information about the PMVAP production cap increase is available at ams.usda.gov/pmvap.

ORGANIC DAIRY MARKETING ASSISTANCE PROGRAM

The new ODMAP, to be administered by USDA's Farm Service Agency (FSA), is intended to help smaller organic dairy farms that have faced a unique set of challenges and higher costs over the past several years that have been compounded by the ongoing pandemic and drought conditions across the country. Many small organic dairy operations are now struggling to stay in business and FSA plans to provide payments to cover a portion of their estimated marketing costs for 2023. Final spending will depend on enrollment and each producers projected production, but ODMAP has

been allocated up to \$100 million.

The assistance provided by ODMAP will be provided through unused Commodity Credit Corporation funds remaining from earlier pandemic assistance programs. The assistance will help eligible organic dairy producers with up to 75 percent of their future projected marketing costs in 2023, based on national estimates of marketing costs. This assistance will be provided through a streamlined application process based on a national per hundredweight payment. The payments will be capped at the first five million pounds of anticipated production, in alignment with preexisting dairy programs that target assistance to those smaller dairies that are most vulnerable to marketing challenges. This program is still in development.

Details about the Organic Dairy Marketing Assistance Program will be available and updated at <u>farmers.gov</u> as more details are released in a Notice of Funds Availability later this year.

USDA touches the lives of all Americans each day in so many positive ways. In the Biden-Harris administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy, and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America. REMEMBER SOUTH CAROLINA'S STATE FORESTS AT TAX TIME

HELP SUPPORT FOREST RECREATION AND OPERATIONS WITH A CHARITABLE CHECK-OFF ON YOUR RETURN

BY SC FORESTRY COMMISSION

The South Carolina Forestry Commission encourages citizens to make a charitable contribution to the SC State Forests Fund on their tax returns.

Taxpayers have the opportunity to support the five state forests – Harbison, Manchester, Poe Creek, Sand Hills, and Wee Tee – by making a check-off contribution on their state tax returns using Form l-330.

South Carolina's state forest system receives no state funding and relies solely on timber receipts, pine straw sales and recreational permit revenue for its operating funds. "Our five state forests are self-supporting, so any money we receive from the check-off program goes right back into these

forests and facilities, all for the benefit of the public," said James Douglas, SCFC State Lands Coordinator.

The State Forests Fund check-off program has raised more than \$210,847 in the 12 years since its inception, with all of the money used to make improvements and repairs that directly benefit visitors and enhance their experience on state forest lands. Your support is helping the state forests carry out their mission to be healthy, productive, forested ecosystems, improving the quality of life of South Carolina's citizens through the environmental, educational, economic, and recreational benefits of active forest management.

Not only do the state forests support themselves, but

they also provide funding to school systems in the counties that host them, giving more than \$1,276,853 to school districts in 11 counties last year alone.

HOW TO GIVE TO THE SC STATE FORESTS FUND:

- Enter the amount of your donation on Line 28 of your individual income tax form, S.C. Form 1040.
- 2. Then enter the amount of your donation on Line 15 of S.C. Tax Form l-330, then again on Line 19.
- 3. Attach S.C. Tax Form I-330 to your tax filing or give it to your professional tax preparer.

SC PORTS HANDLES NEARLY 3 MILLION TEUS IN RECORD 2022

BY SC PORTS

South Carolina Ports had a record 2022 with the most containers ever handled at the Port of Charleston.

SC Ports moved nearly 2.8 million TEUs (twenty-foot equivalent units) in 2022, a 1.5% increase over 2021. When accounting for containers of any size, SC Ports moved more than 1.5 million pier containers in 2022, a 1% increase from 2021.

"South Carolina's excellent port team and maritime community efficiently handled record cargo volumes and expertly navigated supply chain challenges to keep freight moving for our customers," SC Ports President and CEO Barbara Melvin said.

With the resumption of cruises, SC Ports had 261,636 cruise passengers come through the Passenger Terminal last year.

SC Ports moved 199,343 vehicles across the docks of Columbus Street Terminal in 2022, further connecting South Carolina's automakers with global consumers.

Inland Port Greer and Inland Port Dillon handled a combined 167,147 rail moves in 2022, enabling more companies throughout the Southeast to quickly move goods to and from the port via rail.

"South Carolina Ports serves as South Carolina's gateway to the world, giving companies direct access to global markets," Melvin said. "We proudly move goods for advanced manufacturers, retailers, farmers, medical providers, grocery stores, solar panel producers and small businesses, helping to support 225,000 jobs in South Carolina."

BOOMING BUSINESS IN SC

South Carolina's economy is booming as companies make big investments to expand operations and open new facilities to take advantage of the state's strong business climate, excellent workforce, expansive infrastructure network and world-class port.

"South Carolina's booming economy is breaking records left and right because of the communication, collaboration and cooperation among our unmatched strategic assets, including the South Carolina Ports Authority," South Carolina Governor Henry McMaster said. "Our ports' success creates prosperity, growth and opportunity for South Carolinians, which means today's announcement is a sign of more good things to come."

In 2022, the South Carolina Department of Commerce secured more than \$10 billion in total capital investment from companies establishing or

expanding operations in South Carolina. This record investment amount represents 120 projects and more than 14,000 announced new jobs.

"South Carolina is experiencing unprecedented economic development growth as domestic and international companies, alike,

recognize the long-term potential within our borders," Secretary of Commerce Harry M. Lightsey III. "The South Carolina Department of Commerce is proud to collaborate with allied partners and state leadership to prioritize strategic infrastructure investments that help existing and future industry realize that success and maximize efficiencies while creating opportunities for all South Carolinians."

Many of these economic development wins are port-dependent businesses that rely on SC Ports to import goods for production and export products for overseas consumption.

"Major business announcements and expansions are happening in South Carolina, and we have strategically invested in critical port infrastructure to support the growth occurring today and into the future," SC Ports Board Chairman Bill Stern said.

STRONG INFRASTRUCTURE IN SC

With great support from the state, SC Ports has invested more than \$2 billion into port infrastructure in recent years to support the state's booming business sector. Combined with port funding and state funding, SC Ports plans to spend an additional \$2.5 billion over the next decade.

Investments thus far have yielded modernized container terminals with ample capacity, the deepest harbor on the East Coast at 52 feet and a strong rail-served inland port network.

Construction is now underway on SC Ports' Navy Base Intermodal Facility, a modern cargo yard in North Charleston that will by rail-served by CSX, Norfolk Southern and Palmetto Railways. Creating near-dock rail at the Port of Charleston will make South Carolina more competitive as an import

gateway to the United States.

SC Ports is also developing an innerharbor barge operation to support the Navy Base Intermodal Facility; it will transport cargo between container terminals via water.

McMaster allocated \$550 million to build the rail yard and barge operation.

"With critical support from our state leaders, SC Ports is boldly investing in port infrastructure to ensure port-dependent businesses can thrive in South Carolina," Melvin said.

Beyond the port, containers need to move fluidly on highways to reach their destinations — whether that may be a rail yard, manufacturing facility, import distribution center, retail store or a resident's doorstep.

Critical infrastructure investments are happening around the state to support the state's supply chains. The South Carolina Department of Transportation has significantly increased investments to the state's transportation network, spending nearly \$4 billion in construction contracts in 2022.

"We know how important it is to our thriving economy to ensure that goods can move efficiently across the state and region," SC Department of Transportation Secretary Christy Hall. "With the support of the Governor and the General Assembly, the South Carolina Department of Transportation has made unprecedented investment in our state's infrastructure system since 2017. This work includes more than 100 miles of interstate work either complete or underway, improving our critical freight corridors and making good on our promises to the people of South Carolina."

CLEMSON UNITES WITH FFAR TO TACKLE PEANUT ALLERGIES

BY DENISE ATTAWAY, CLEMSON UNIVERSITY

Peanuts are an affordable source of important nutrients but contain protein allergens that can harm some people.

Sachin Rustgi, a molecular breeder at the Clemson University Pee Dee Research and Education Center near Florence, South Carolina, is leading a study funded by the Foundation for Food and Agriculture Research (FFAR) to learn ways to make peanuts less allergenic by reducing the amount of common allergy-causing proteins and increasing the amount of healthy oil (high-oleic) in peanut seeds.

The project focuses on developing peanut genetics with reduced allergen content and an enhanced amount of healthy fat using both conventional breeding techniques and CRISPR (Clustered Regularly Interspaced Short Palindromic Repeats) gene-editing technology. The researchers aim to make more allergy management and oral immunotherapy available for individuals sensitive to peanut allergens.

"New lines developed from this research will benefit people

who are sensitive to peanuts," said Rustgi, principal investigator in the research. "In addition, availability of peanut lines with reduced allergen content will alleviate the need to create and maintain a peanut-free environment and thus could reduce costs associated with managing peanut allergies."

Much of the research is conducted in the Rustgi Lab, part of Clemson's Advanced Plant Technology Program housed at the Pee Dee REC. In addition to using conventional breeding methods and CRISPR-Cpf1 gene-editing technology, the researchers also are using sophisticated biochemical and immunological evaluation methods to develop new peanut genotypes that are less allergenic and high in oleic fatty acid.

Other researchers involved in the project are: Sruthi Narayanan, a Clemson University crop ecophysiologist; Jeff Dunne and Ryan Andres, peanut breeders with North Carolina State University; Edwin Kim and Mike Kulis, immunologists with the University of North Carolina; and Shyamalrau Tallury, plant geneticist with the United Stated Department of Agriculture's Agricultural Research Service.

In addition to being less allergenic and containing higher levels of healthy fat, these new peanut lines are expected to exhibit long shelf-life and tolerance to heat stress, benefiting growers, producers and consumers. Rustgi said the new genotypes will create a healthy choice for farmers in low-income countries who farm for sustenance and don't have the option to grow other crops.

The researchers are working with producer-driven commodity boards including the South Carolina Peanut Board and the National Peanut Board. The reduced-immunogenicity, high-oleic peanut genotypes and resources developed during this

Sixteen proteins in peanut kernels have been identified as allergens. Among them, four proteins are classified as major allergens.

In addition to bearing proteins, the peanut is a primary oil source. Peanut oil comprises 20% saturated fatty acids, which have been associated with increased serum low-density lipoprotein cholesterol levels and the incidence of cardiovascular disease (CVD).

The United States is the fifth-largest peanut

producer in the world. Besides being locally consumed, a large proportion (499,685 metric tons in 2021) of peanuts is annually exported to Canada, Mexico and European Union countries. Unfortunately, these countries also reported a high peanut allergy and CVD prevalence.

Peanut allergy currently requires the complete exclusion of peanuts from a person's diet. However, avoiding peanuts, other crossreacting tree nuts and legumes limits individuals' options to obtain vegetable proteins. Also, totally

avoiding peanuts is not achievable because of the presence of peanut in processed foods and unintended contamination. Given peanuts' economic and nutritional importance, the researchers say it is worth correcting associated health concerns.

In addition to peanut, Rustgi and his team also are testing many varieties of wheat to find ones naturally less immunogenic than others. Their hope is these low-immunogenicity varieties can be bred with crop varieties that have desirable traits, such as high yields or pest resistance. The goal is to develop reduced-gluten varieties that can be commercially grown.

Foundation for Food and Agriculture Research

The Foundation for Food and Agriculture Research (FFAR) builds public-private partnerships to fund bold research addressing big food and agriculture challenges. FFAR was established in the 2014 Farm Bill to increase public agriculture research investments, fill knowledge gaps and complement USDA's research agenda. FFAR's model matches federal funding from Congress with private funding, delivering a powerful return on taxpayer investment. Through collaboration and partnerships, FFAR advances actionable science benefiting farmers, consumers and the environment.

project will be available free to public peanut breeding programs in the United States and abroad. This project is expected to continue through 2025.

Saharah Moon Chapotin, FFAR executive director, said this research offers hope for a solution to peanut allergy.

"Current remedies for peanut allergy target the human response to the allergens, not the peanut allergens themselves," Chapotin said.

PEANUT ALLERGY KNOWLEDGE

Peanuts are an affordable source of proteins, health-promoting fatty acids, antioxidants, vitamins and minerals. However, peanuts also are among the eight primary sources of food allergies recognized by the United States Food and Drug Administration and, along with tree nuts, are responsible for 90% of allergy-related fatalities.

Studies show peanut allergies affect about 9.6 million children and adults in the United States. During the past two decades, peanut allergy diagnoses rose from 0.4% in 1997 to 2.9% in 2021. Experts say this number is escalating. Raw peanuts and derived products lead to various allergic responses, the most common being immediateonset anaphylaxis.

IT'S ALL ABOUT HERBS FESTIVAL SET FOR MARCH 25

BY THE HERB BUNCH

Join the Lexington County Herb Bunch in cooperation with Clemson Cooperative Extension for its 11th annual "It's All About Herbs" Festival on Saturday, March 25 from 9 a.m.-3 p.m. at the Lexington County Museum, 231 Fox Street in Lexington.

The family-friendly event is free for all. There will be a wide selection of herbs and gardening- related items for sale, plus local vendors and a bake sale.

The majority of proceeds will go toward a scholarship to a qualified student from Lexington

County to further his or her education in the horticulture, agriculture or nutrition field.

Find The Herb Bunch on Facebook for more information.
